

Upwood and the Raveleys Parish Council

Upwood and the Raveleys Parish Council Communications Working Party has just learned that its bid for £3,000 to the Ramsey Wind Farm Community Benefit Fund has been successful!

This means that we will:

- Re-furbish/replace/re-locate our six existing noticeboards and purchase a new noticeboard for the village hall to enhance the provision of written communication across the parish.
- Install **Wifi** in the village hall and purchase a new digital projector to improve the quality and scope of digital communications for all users.
- Purchase a dedicated laptop and software for the newsletter editorial team.
- Add four colour pages to each edition of the newsletter to enhance its visual appeal.
- Modernise the parish website www.upwood.org and Facebook page. Community groups will soon be invited to manage their own areas to facilitate sharing of digital information.

Each item is aimed at improving communication and facilitating access to information to promote social inclusion within and beyond the parish boundaries; a direct response to the issues you've highlighted through the CLP consultation.
